**Annex to the note verbale dated 14 March 2006 from the Permanent Representative of Japan to the United Nations addressed to the secretariat of the Committee**

**Report on actions taken by the Government of Japan to implement the measures imposed by resolution 1572 (2004) concerning Côte d'Ivoire**

1. Japan's export control legislation and measures in accordance with paragraphs 7 of SC Resolution 1572(2004) extended by resolution 1643(2005).

The Government of Japan has been dealing with arms control carefully in accordance with the Three Principles on Arms Exports (hereinafter referred to as "the Three Principles") and their related policy guidelines in order to avoid any possible aggravation of international conflicts. The Three Principles have been the basic policy concerning Japan's arms exports since they were declared at the Diet session in 1967. Arms as referred to in the Three Principles are defined as goods which are used by military forces and which are directly employed in combat — specifically, 17 goods listed under the Export Trade Control Order (see enclosure).

Under the Three Principles, arms exports to the following countries or regions shall not be permitted:
(1) Communist bloc countries,
(2) Countries subject to arms exports embargo under United Nations Security Council resolutions, and
(3) Countries involved in or likely to be involved in international conflicts.

Subsequently, in February 1976, the Government of Japan announced the implementing policy guidelines at the Diet session that arms exports to other areas not included in the Three Principles will also be restrained in conformity with Japan's position as a peace-loving nation. In other words, the implementing collateral policy guidelines declared that the Government of Japan shall not promote "arms" exports, regardless of the destination.

Japan's export control system is based on the Foreign Exchange and Foreign Trade Law (Law No. 228 of 1948) (hereinafter referred to as "Foreign Exchange Law"), which provides the general legal framework governing Japan's external transactions, as well as the Export Trade Control Order (Executive Order No. 414 of 1949) (for goods) and the Foreign Exchange Order (Executive Order No. 260 of 1980) (for technologies). In accordance with these regulations, the Government of Japan exercises careful control over exports of all items on the lists attached to the Orders by means of a licensing requirement.

Based on the Foreign Exchange Law, the Government of Japan controls exports of goods

and technologies which appear as the 17 items described as "subject to control" in the Export Trade Control Order Attachment List 1 and the Foreign Exchange Order Attachment List, respectively. Goods and technologies described on these Lists correspond to the goods and technologies controlled by the four international export control regimes, namely Wassenaar Arrangement, Missile Technology Control Regime, Nuclear Suppliers Group and Australia Group.

2. Japan's export control legislation and measures in accordance with paragraphs 6 of Security Council Resolution 1643(2005).

In accordance with the Foreign Exchange Law, the Government of Japan has taken measures to install an import ban on all rough diamonds from Côte d'Ivoire, except as permitted by the Minister of Economy Trade and Industry.

3. Measures in accordance with paragraphs 9 and 11 of resolution 1572(2004) as well as paragraph 4 of resolution 1643(2005).

The Government of Japan is working seriously to take the necessary measures in accordance with the Foreign Exchange Law and the Immigration Control and Refugee Recognition Act, aimed at the individuals designated by the Committee established by paragraph 14 of resolution 1572.

Enclosure

**Arms and arms production-related equipment listed under the Export Trade Control Order**

(1) Firearms and cartridges to be used therefor (including those to be used for emitting light or smoke), and accessories thereof, as well as parts thereof.

(2) Ammunition (excluding cartridges), and equipment for its dropping or launching, and accessories thereof, as well as parts thereof.

(3) Explosives (excluding ammunition) and military fuel.

(4) Explosive stabilizers.

(5) Directed energy weapons and parts thereof.

(6) Kinetic energy weapons (excluding firearms) and equipment for their launching, as well as parts thereof.

(7) Military vehicles, and accessories and bridges specially designed for military use thereof, as well as parts thereof.

(8) Military vessels, and hulls and accessories thereof, as well as parts thereof.

(9) Military aircraft and accessories thereof, as well as parts thereof.

(10) Anti-submarine nets and anti-torpedo nets as well as buoyant electric cable for sweeping magnetic mines.

(11) Armor plates and military helmets, as well as bullet-proof jackets and parts thereof.

(12) Military searchlights and control equipment thereof.

(13) Bacterial, chemical, and radio-active agents for military use, as well as equipment and parts thereof for dissemination, protection, detection, or identification thereof.

(13-2) Chemical mixtures specially formulated for the decontamination of objects contaminated with biological agents and radioactive materials adapted for use in war and chemical warfare agents.

(14) Biopolymers for detection and identification of chemical agents for military use and cultures of cells for production thereof, as well as biocatalysts for decontamination and degradation of chemical agents for military use and expression vectors, viruses or cultures of cells containing the genetic information necessary for production thereof.

(15) Equipment and parts thereof for the production or testing of military explosives.

(16) Equipment for the production or testing of arms, as well as parts and accessories thereof.
